

Lab Tests Online-UK

The work of the clinical laboratory professional, who analyses chemical indicators in the body to provide the doctor with a clearer picture of a patient's health, has long been an unseen aspect of health care. But clinical lab tests often provide the link between the patient's symptoms and the doctor's diagnosis. Through preventative screening, lab tests also help with the early detection of potentially fatal conditions. In short, lab tests can help both to save lives and to improve the quality of life.

[Lab Tests Online-UK](http://www.labtestsonline.org.uk) is a website that has been designed to help patients to better understand the many clinical lab tests that are part of routine care as well as diagnosis and treatment of a broad range of conditions and diseases. [Lab Tests Online-UK](http://www.labtestsonline.org.uk) is supported by the Royal College of Pathologists.
